# CHRIS BENZ THE STORY

The story of CHRIS BENZ Watches Intl. is the story of a young man's passion for the sea and water sports. Already as a young boy, Chris Benz, great-grandson to the founder of the Württemberg Watch Factory, was a water sports enthusiast and diver, who often spent more time under the water than over it.

He joined forces with friends and other divers, diving instructors, surfers, sailors, and other water-sports professionals who shared his passion for the fascinating world of water. To join CHRIS BENZ Ocean Team, water-sports enthusiasts and professionals around the world, men and women alike were and still are welcome to apply for sponsorship.

The experienced underwater and overwater sports aficionados and professionals were not fully satisfied with any of the diving watches available on the market. Each watch had its own qualities, but there were always details that did not match up to their expectations. After lots of tests, shop-talk and consultation, they decided what constitutes a „proper“ diving watch.

As professionals they knew what other

professionals needed and as an entrepreneur Chris knew how to translate their needs and requirements into an affordable product.

This marked the creation of the first models of the CHRIS BENZ Collection, and the response from divers and water-sports enthusiasts was both immediate and positive - so the brand was born.

## CHRISTIAN BENZING II FOUNDER & HEAD

BIRTHDAY:	20.05.1967
LIVES IN:	Stuttgart, Munich, Capetown (Southafrika) and Fuerteventura

# CHRIS BENZ WATCHES

## From professionals for professionals

These watches, which are extremely popular with professional and amateur divers as well as other water sports enthusiasts and trendsetters alike, are designed to withstand the toughest underwater use and are designed to impress with their uncompromising ergonomic design, outstanding reliability and superior craftsmanship.

Solid marine stainless steel casings, precision mechanisms, reliable display instruments, helium escape valve as well as depthmeter technology and warranted water resistance of up to 200 bar - all are standard features integrated in our model range. Not only are our watches feature packed, but also utilize a specific crystal made of ultra scratch-proof and almost indestructible sapphire crystal. With a hardness of 9, the sapphire crystal is surpassed only by diamond with a measure of 10 on the hardness scale from 1 to 10. Standard watch crystals have an average hardness of 6,5.

An additional feature of our depthmeter is the integration of handy lunettes which allow for easy adjustment even when wearing neoprene gloves. The most notable feature is the use and integration of

the solid marine stainless steel casings in all of our watch models as well as the extremely robust straps. These features are guaranteed to withstand even the bite of a Great White Shark.

A CHRIS BENZ watch meets every challenge. CHRIS BENZ watches are more than a diver's watch:

They are a very special attitude to life. An attitude to life, that connects people worldwide. Get a part of CHRIS BENZ - **SHARK PROOF.**

## SHARK PROOF.

More informations you will find at:  
<http://www.chrisbenz.de>

# CHRIS BENZ SHARK PROOF.

## Shark - bite resistant

All watches of CHRIS BENZ CHRIS BENZ Taucheruhren are **SHARK PROOF**. - proven to withstand the bite of Great White Shark.

The **SHARK PROOF**. - test was carried out under real conditions by experienced divers and shark experts off the waters of Gansbaai in South Africa known as Shark Alley.

During the test, the watches were subjected to the bite test by a real Great White

Sharks in the wild. Only CHRIS BENZ watches, which have survived this bite test, may rightfully be described as **SHARK PROOF**. ("shark-bite resistant"). The sharks were not harmed during the performance of the test !

Inexperienced water sports enthusiasts are strongly advised not to try this test themselves when encountering sharks. It is definitely preferable to treat these

elegant sea predators with the respect they deserve and admire them from a safe distance.

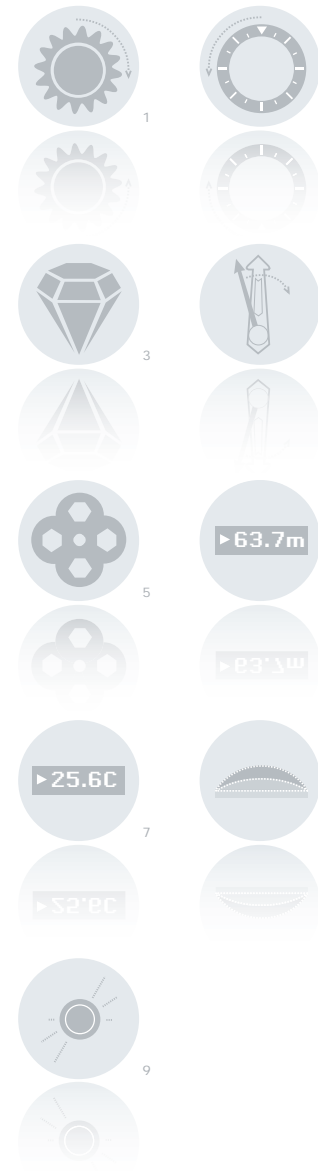

## CHRIS BENZ HIGH-PERFORMANCE TECHNOLOGY

# CHRIS BENZ FEATURES

Each model was developed by professional divers, dive guides, world class surfers and sailors, and underwent tests and improvements in our own test centres in Germany and South Africa to guarantee absolute satisfaction.

Equipped with outstanding technical features a CHRIS BENZ watch is a step ahead of every challenge. CHRIS BENZ - stands for diver's watches, made from professionals for professionals.

Thus, the models were already exposed in extreme conditions during the development phases in our own laboratory - the CHRIS BENZ LAB.

- The Heat stability of the solid marine stainless steel case has been tested in conditions at 1000 °C
- Water-resistance test during extreme as well as practical conditions by leading athletes of the CHRIS BENZ Ocean Team
- Accuracy test of movement in a certified shake test (CB Selected Movement®)

- 1 II SCREW LOCKED CROWN:**  
The double gaskets mechanism and the additional fine thread of the closable crown warranty absolute water-resistance.
- 2 II SINGLE-SIDED TURNABLE BEZEL:**  
Device for reading and controlling the elapsed or remaining dive time. The single-side pivoting mechanism avoids falsifying the showed time and therefore assures the safety of the diver.
- 3 II SAPPHIRE CRYSTAL:**  
The hardest of all crystals is extremely scratch resistant, less sensitive to impact, has a very high refraction and is almost indestructible.
- 4 II TRAILING HAND:**  
The depth display works with two hands. The small hand shows the current depth, whereby the big hand is trailed to the maximum depth which was reached during the current dive.
- 5 II HELIUM ESCAPE VALVE:**  
The helium valve allows existing helium atoms to exit therefore preventing the build-up of internal pressure which can lead to a loosening of the glass of the watch.
- 6 II ELEKTRONIC DEPTHMETER:**  
Pressure data is identified by means of the depthmeter and is transferred with an accuracy of 10cm to the display.
- 7 II ELEKTRONIC TEMPERATURE METER:**  
Temperature data of the water is identified by means of the temperature sensor and is transferred to the display.
- 8 II BUBBLEVERSION:**  
Sapphire crystal available in three different designs: Flat, Bubble and Superbubble.
- 9 II SAFETY-LIGHTING-SYSTEM:**  
Thanks to the specially developed layer the markers and hands are highly luminescent and thus they are longer shining than the current standard luminescent coatings.

START YOUR OWN  
CHALLENGE.

## Dolphin aid e.V.

Dolphin aid e.V. has supported thousands of families since its conception in 1995. Together with active and convinced individual supporters, famous sponsors and support from small donations, dolphin aid has paved the way to provide dolphin therapy for many families.

Additionally, dolphin aid is a great supporter of the research institutes that are trying to advance the acceptance of therapeutic applications for diseases and ailments within the German health care system. The concept even goes so far as to spearheading a reimbursement plan by health insurance companies for patients using such therapeutic methods. Dolphin aid e.V. is a recognized foundation particularly worthy of state subsidies.

CHRIS BENZ supports dolphin aid e.V. with its own jewellery collection, which is composed by various and high quality jewelry.

Available at your Official CHRIS BENZ Dealer or <http://www.chrisbenz.de>.

### CHRISTIAN BENZING II FOUNDER & HEAD

„We want to provide children the opportunity to experience the positive energy emitted by the element of water and the dolphins living within it. I have spent most of my life on and in the water, and have won wonderful impressions and have gained practical knowledge that accompanies me on a daily basis. For people, the dolphin remains a mythical animal that every child wants to get to meet. Just the thought of this incredible creature fills the mind with joy and gives you strength.

During my visit diving at the dolphin aid - Therapy Center I was ensured that the dolphins are handled in a very good and professional manner and that the children are affectionately and cordially cared for. This experience with the animals deeply affects the soul of the children and builds a sustainable effect.

We are very thankful to support dolphin aid.“
